

# pritish patil

iamprishpatil@gmail.com ugpatil@ug.iisc.in +91-8861-557-553

## interests

Theoretical Neuroscience, Computational Neuroscience, Stochastic Modeling, Numerical Methods, Systems Biology, Stochastic Differential Equations, Spatial Dynamics, Applied Mathematics in Biology.

## education

2012–2016	<b>Bachelor of Science</b> Biology Major with Mathematics Minor	Indian Institute of Science, Bangalore
2012	<b>12th Grade</b> Science Stream	KVN Naik College, Nashik
2010	<b>10th Grade</b> Matriculation	JDC Bytco High School, Nashik

## major achievements

2012	Silver Medal@ <b>International Biology Olympiad</b>	Singapore, Singapore
2011	Silver Medal@ <b>International Biology Olympiad</b>	Taipei, Taiwan
2010	Silver Medal@ <b>International Astronomy Olympiad</b>	Crimea, Ukraine

## research experience

2015	<b>Making a realistic model CA1 Pyramidal Neuron in MOOSE (Ongoing)</b> Guide : Dr. Upi Bhalla, NCBS, Bangalore Coming up with a distribution ion channels for the CA1 Pyramidal neurons which has realistic behavior for different morphologies. All coding in MOOSE	NCBS, Bangalore
2014	<b>Finding network topologies which show adaptation response</b> Guide : Dr. Sandeep Krishna, NCBS, Bangalore Modelled a general three node gene/protein network using a system of differential equations and simulated it. The aim was to find the topologies which show the adaptation response.	NCBS, Bangalore
2013	<b>Modelling of High Energy Cosmic Ray Spectrum</b> Guide : Prof. Mayank Vahia, TIFR, Mumbai Explored the effect of magnetic field on cosmic rays produced inside galaxies and proposed an explanation the features of cosmic ray spectrum. Tried to explain galactic X-Ray halos using these cosmic rays.	HBCSE, Mumbai
2013	<b>Lab techniques for isolation and purification of proteins</b> Guide : Prof. V. Nagaraja, IISc, Bangalore Learned various lab techniques like PAGE, various types of chromatography and Genenreal techniques in microbiology.	IISc Bangalore
2012	<b>Constraining Dark Energy Parameters using Supernova-1a data</b> Guide : Prof H.K. Jassal, IISER Mohali Understood standard cosmology, obtained constraints on dark energy parameters of the standard model and evaluated different cosmological models by comparing with SN1A data(Union Supernova Project).	IISER, Mohali
2012	<b>Karyotyping for screening of chromosomal abnormalities</b> Guide : Dr. Dnyandeo Chopade, Genetic Health & Research Centre, Nasik Mastered the basics of Karyotyping. Learned to make karyotypes from blood and from chorionic villi. Apprenticed for detection of defects in chromosomes in the karyotypes.	Genetic Health & Research Centre, Nasik

- 2011 **A stacking analysis of radio properties of photometrically selected quasars** NCRA, Pune  
 Guide : Dr. Yogesh Wadadekar, NCRA, Pune  
 Analysed the radio properties of 1 million quasars found by SDSS photometrically. Correlated the optical data to radio data and did statistics on radio image stacks of quasars.
- 2010 **Effect of metallicity on the evolution of stellar populations** NCRA, Pune  
 Guide : Dr. Yogesh Wadadekar, NCRA, Pune  
 Studied the effects of changes in metallicity of a nebula upon the evolution of clusters of stars within it.
- 2009 **Study of Irregularities in the Spiral Structure of M101** HBCSE, Mumbai  
 Guide : Prof. Mayank Vahia, TIFR, Mumbai  
 Analysed the spiral structure of M101 Pinwheel galaxy, examined the irregularities and proposed explanations for them.

## course projects

- 2015 **Analysis of Dendritic transmission** Theoretical and Computational Neuroscience  
 Prof. Rishikesh Narayanan and Prof. SP Arun, IISc Bangalore  
 Using a realistic detailed neuronal model, studied dendritic transmission and computation. Using only poisson input and corresponding output spike trains, calculated time for dendritic transmission, and after correcting for this delay, analyzed how synaptic processing.
- 2014 **Spatial Dynamics of Sympatric Speciation** Theoretical and Mathematical Ecology  
 Prof. Vishweshha Guttal, IISc Bangalore  
 Studied spatial dynamics of sympatric speciation due to disruptive selection. Reproduced some of the results in "Speciation along environmental gradients" by Michael Doebeli and Ulf Dieckmann.
- 2014 **Leeches: Animal movements and random walks** Experiment in Ecology  
 Dr. Farah Ishtiaq, IISc Bangalore  
 Explored how the leeches could be locating their prey in absence of stimulus. Found that the leeches perform a correlated random walk, which emulates a Levy random walk.
- 2014 **Comparing Weiner chaos decomposition and Monte Carlo methods for solving stochastic differential equations.** Introduction to Scientific Computing  
 Prof. S. Raha, IISc Bangalore  
 Used Weiner Chaos Decomposition and Monte Carlo method to find the solutions of a system of stochastic differential equations numerically. Compared the accuracy of and the time taken by these methods.
- 2014 **Sexual Selection with a Two Locus Model** Theoretical and Mathematical Ecology  
 Prof. Vishweshha Guttal, IISc Bangalore  
 Modelled the effects of sexual selection on two loci in haploid and diploid systems analytically and other complex cases. Studied the equilibria of the system and determined their stability. Analysed the dynamics of invasion of one genotype by another.

## programming and computers

### Common programming

C, R, Python, MATLAB,  $\text{\LaTeX}$ , shell/bash, linux.

### Neuroscience related

MOOSE, NEURON, BRIAN

## relevant courses [grad level]

### biology

- Topics in Systems Neuroscience
- Theoretical and Computational Neuroscience
- Theoretical and Mathematical Ecology
- Spatial Dynamics in Biology
- Cellular Neurophysiology
- Fundamentals of Systems and Cognitive Neuroscience
- Fundamentals of Molecular and Cellular Neuroscience

### mathematics

- Stochastic Processes [martingales and brownian motion]
- Probability Theory [measure theoretic]
- Measure theory
- Algebra
- Topology
- Linear Algebra
- Real Analysis

### engineering

- Information Theory

## relevant introductory courses

- Physics (3 courses)
- Chemistry (3 courses)
- Mathematics (3 courses)
- Biology (3 courses)

## relevant courses [undergrad level]

### biology

- Introductory Structural Biology
- General Biochemistry
- Introductory Physiology
- Developmental Biology

### mathematics

- Multivariable Calculus and Complex Variables
- Elementary Algebra and Number Theory
- Probability and Statistics

### engineering

- Introduction to Scientific Computing
- Algorithms and Programming
- Introduction to Electrical and Electronics Engineering
- Introduction to Material Sciences
- Introduction to Environmental Sciences

### laboratory courses

- Experiments in Biochemistry and Physiology
- Experiments in Microbiology and Ecology
- Experiments in Molecular Biophysics
- Experiments in Neurobiology

## other notable achievements

- |             |   |               |
|-------------|---|---------------|
| 2011        | <b>Selected as a member of Indian team for International Earth Science Olympiad</b>           | Modena, Italy |
|             | One of top 4 from India to get selected.  |               |
| 2011 – 2014 | <b>Recipient of KVPY (Kishore Vaigyanik Protsahan Yojana) Scholarship</b>                     |               |
|             | Awarded to the top 200 science students from India each year.                                 |               |
| 2009 – 2011 | <b>Recipient of NTSE (National Talent Search Exam) Scholarship</b>                            |               |
|             | Awarded to the top 1000 students from India each year.  |               |
| 2013        | <b>Won MIMAMSA, a national inter-college science quiz</b>                                     | IISER, Pune   |
|             | Qualified for the final quiz from amongst more than 100 teams and WON the 14 hours long quiz. |               |

## camps and workshops attended

- |            |   |                 |
|------------|---|-----------------|
| 2015       | <b>Computational Approaches to Memory and Plasticity</b>  | NCBS, Bangalore |
|            | 16-day summer school on the theory and simulation of learning, memory and plasticity in the brain.  |                 |
| 2014       | <b>Physics of Life, NCBS-Simons Annual Monsoon School</b>   | NCBS, Bangalore |
|            | Topics included: biophysics and soft-matter physics; information processing and decision making; stochastic processes in molecules or populations; dynamical systems models of genetic networks or biomechanical systems. |                 |
| 2011, 2012 | <b>Vijyoshi Camp</b>  | IISc, Bangalore |
|            | Similar to Lindau Meet with Noble Laureates for students. For top ≈600 science students across India  |                 |
